

Claims

What is claimed is:

1. A system, comprising:
a computer system for:
through a network, providing a template to a user;
through the network, receiving a selection from the user of the
template; and
generating a database including the template selected by the
user.
2. The system of claim 1 wherein the template includes a predefined table.
3. The system of claim 1 wherein the template includes a predefined form.
4. The system of claim 1 wherein the template includes a predefined field.
5. The system of claim 1 wherein the template includes a predefined section.
6. The system of claim 5 wherein the predefined section includes a predefined
field.
7. The system of claim 1 wherein the computer system is for:
in response to receiving a selection from the user, associating the
template with a program associated with an agency.

- 1 8. The system of claim 1 wherein the computer system is for:
2 in response to receiving information associated with a form created by
3 the user, generating the database including the form.
- 1 9. The system of claim 8 wherein the information associated with the form
2 includes a field selected by the user.
- 1 10. The system of claim 9 wherein the information associated with the form
2 includes an attribute associated with the field, and wherein the attribute is
3 changeable by the user.
- 1 11. The system of claim 1 wherein the computer system is for:
2 receiving a change to the template from the user; and
3 generating the database including the change to the template.
- 1 12. The system of claim 1 wherein the computer system is for:
2 receiving login information from the user; and
3 authenticating the user using the login information prior to providing the
4 template to the user.
- 1 13. A method, comprising:
2 through a network, providing a template to a user;
3 through the network, receiving a selection from the user of the
4 template; and
5 generating a database including the template.
- 1 14. The method of claim 13 further comprising:
2 through the network, providing the template to the user, the template
3 including a predefined table.

- 1 15. The method of claim 13 further comprising:
2 through the network, providing the template to the user, the template
3 including a predefined form.

- 1 16. The method of claim 13 further comprising:
2 through the network, providing the template to the user, the template
3 including a predefined field.

- 1 17. The method of claim 13 further comprising:
2 through the network, providing the template to the user, the template
3 including a predefined section.

- 1 18. The method of claim 17 further comprising:
2 through the network, providing the template to the user, the template
3 including the predefined section, and the predefined section including a
4 predefined field.
5

- 1 19. The method of claim 13 further comprising:
2 in response to receiving a selection from the user, associating the
3 template with a program associated with an agency.

- 1 20. The method of claim 13 further comprising:
2 in response to receiving information associated with a form created by
3 the user, generating the database including the form.

- 1 21. The method of claim 20 wherein the information associated with the form
2 includes a field selected by the user.

- 1 22. The method of claim 21 wherein the information associated with the form
2 includes an attribute associated with the field, and wherein the attribute is
3 changeable by the user.
- 1 23. The method of claim 13 further comprising:
2 receiving a change to the template from the user; and
3 generating the database including the change to the template.
- 1 24. The method of claim 13 further comprising:
2 receiving login information from the user; and
3 authenticating the user using the login information prior to providing the
4 template to the user.
- 1 25. A computer program product, comprising:
2 a computer program processable by a computer system for causing
3 the computer system to:
4 through a network, provide a template to a user;
5 through the network, receive a selection from the user of the
6 template; and
7 generate a database including the template; and
8 an apparatus from which the computer program is accessible by the
9 computer system.
- 1 26. The computer program product of claim 25 wherein the computer program is
2 processable by the computer system for causing the computer system to:
3 through the network, provide the template to the user, the template
4 including a predefined table.

- 1 27. The computer program product of claim 25 wherein the computer program is
2 processable by the computer system for causing the computer system to:
3 through the network, provide the template to the user, the template
4 including a predefined form.
5
- 1 28. The computer program product of claim 25 wherein the computer program is
2 processable by the computer system for causing the computer system to:
3 through the network, provide the template to the user, the template
4 including a predefined field.
- 1 29. The computer program product of claim 25 wherein the computer program is
2 processable by the computer system for causing the computer system to:
3 through the network, provide the template to the user, the template
4 including a predefined section.
5
- 1 30. The computer program product of claim 29 wherein the computer program is
2 processable by the computer system for causing the computer system to:
3 through the network, provide the template to the user, the template
4 including the predefined section, and the predefined section including a
5 predefined field.
- 1 31. The computer program product of claim 25 wherein the computer program is
2 processable by the computer system for causing the computer system to:
3 in response to receiving a selection from the user, associate the
4 template with a program associated with an agency.
5
- 1 32. The computer program product of claim 25 wherein the computer program is
2 processable by the computer system for causing the computer system to:

3 in response to receiving information associated with a form created by
4 the user, generate the database including the form.

1 33. The computer program product of claim 32 wherein the information
2 associated with the form includes a field selected by the user.

1 34. The computer program product of claim 33 wherein the information
2 associated with the form includes an attribute associated with the field, and
3 wherein the attribute is changeable by the user.

1 35. The computer program product of claim 25 wherein the computer program is
2 processable by the computer system for causing the computer system to:
3 receive a change to the templates from the user; and
4 generate the database including the change to the template.

1 36. The computer program product of claim 25 wherein the computer program is
2 processable by the computer system for causing the computer system to:
3 receive login information from the user; and
4 authenticate the user using the login information prior to providing the
5 template to the user.
